

## **GitHub classroom notes**

GitHub Docs

<https://git-scm.com/docs>

GitHub Account

GitHub.com

Install Git

<https://git-scm.com/>

Configure Git

Username

`git config --global user.name`

Email

`git config --global user.email`

Check Configuration

`git config user.name`

`git config user.email`

Add all files

`git add .`

Add specific files

`git add filename.html`

Check current directory

`pwd`

Check status

`git status`

Commit changes

`git commit -m "Your message"`

Push changes to the remote repository

`git push origin branch-name`

Git Clone

`git clone https://github.com/SparkAndBuild/GitLearning.git`
